*(Tippecanoe Co. Marriages - Bk 2 p 228:

Grandison I. Dickey - Isabella Baker - lic 20 Dec 1836
mar 22 Dec 1836)

The first part of the paper discusses the importance of the study of the history of the English language. It is argued that a knowledge of the history of the language is essential for a full understanding of the language in its present state. The second part of the paper discusses the development of the English language from its roots in Old English to its present state. It is argued that the English language has developed through a process of continuous change, and that this change has been influenced by a variety of factors, including contact with other languages and the influence of social and cultural changes. The third part of the paper discusses the role of the English language in the world today. It is argued that the English language has become a global language, and that it plays a central role in international communication and trade. The fourth part of the paper discusses the future of the English language. It is argued that the English language will continue to evolve, and that it will remain an important language in the world for many years to come.
